

MEETING #4

Date: February 24, 2026

Time: 8:00-9:00 AM

Location: LEEP 2 Study Room 2320

Objective: Continue progress of the SRS Document

Team Members Present: Chase, Courtney, Jason, Taryn, Isaiah

Task Completion:

- Requirements document (in progress)
- Exploring Godot vs Qt for GUI

Brainstorm Session:

- Requirements
 - Product Perspective
 - Means of front-end user interface (changed from Godot to Qt)
- Found that Qt is better suited for our desired project tasks
- Godot might have too many features for us as beginners and what we intend to use it for
- Functional Requirements
 - Arithmetic expressions, precedence, computations

Roles:

- **Project Lead:** Chase
- **Project Assist:** Taryn
- **Administrator:** Isaiah
- **Administrator Assist:** Courtney
- **Technical Lead:** Jason
- **Data Administrator:** Eian

Task Allocation:

- **Eian:**

- **Jason:** Researching Godot vs Qt, brainstorming functional requirements
- **Courtney:** Filling out meeting log, researching Godot vs Qt
- **Isaiah:** Filling out requirements document, communicating needs to complete document
- **Chase:** Assisting with requirements document, looking into Godot and Qt
- **Taryn:** Aiding in brainstorming of functional requirements

General Notes:

- Continued editing requirements document
- Finished Product Perspective section
- Decided Qt will be better for our project than Godot
- Started functional requirements sections

Follow-Up Actions:

- NA
