

# Arithmetic Expression Evaluator in C++

## Test Cases

Version 1.0

*<Note: The following template is provided for use with the Unified Process for EDUcation. Text enclosed in square brackets and displayed in blue italics (style=InfoBlue) is included to provide guidance to the author and should be deleted before publishing the document. A paragraph entered following this style will automatically be set to normal (style=Body Text).>*

*<To customize automatic fields (which display a gray background when selected), select File>Properties and replace the Title, Subject and Company fields with the appropriate information for this document. After closing the dialog, automatic fields may be updated throughout the document by selecting Edit>Select All (or Ctrl-A) and pressing F9, or simply click on the field and press F9. This must be done separately for Headers and Footers. Alt-F9 will toggle between displaying the field names and the field contents. See Word help for more information on working with fields.>*

## Test Cases

### 1. Purpose

*This Test Case Specification document for the Calculatorz defines a test case for an item that should be tested.*

*<The sections of the test case specification shall be ordered in the specified sequence. Additional sections may be included at the end. If some or all of the content of a section is in another document, then a reference to that material may be listed in place of the corresponding content. The referenced material must be attached to the test case specification or available to users of the case specification.>.*

### 2. Basic Valid Expression

#### 2.1 Test case identifier

ID: TC-TOK-01

#### 2.2 Test item

Tokenizer module. This test checks whether the tokenizer correctly identifies parentheses, numbers, addition, and division operators in a normal arithmetic expression.

#### 2.3 Input specifications

Input: (3 + 5) / 6

#### 2.4 Output specifications

Output: <{LeftParen "("}, {Number "3"}, {Plus "+"}, {Number "5"}, {RightParen ")"}, {Divide "/"}, {Number "6"}>

#### 2.5 Environmental needs

*Specify any other requirement.*

#### 2.6 Special procedural requirements

*Describe any special constraints on the test procedures that execute this test case. These constraints may involve special set up, operator intervention, output determination procedures, and special wrap up.*

#### 2.7 Intercase dependencies

*List the identifiers of test cases that must be executed prior to this test case. Summarize the nature of the dependencies.*

### 3. Whitespace Handling

#### 3.1 Test case identifier

ID: TC-TOK-02

|                                        |                  |
|----------------------------------------|------------------|
| Arithmetic Expression Evaluator in C++ | Version: 1.0     |
| Test Cases for Tokenizer Module        | Date: 2026-05-04 |

### 3.2 Test item

Tokenizer module. This test checks whether the tokenizer ignores extra spaces and still produces the correct tokens.

### 3.3 Input specifications

Input: 10 \* 2

### 3.4 Output specifications

Output: <{Number "10"}, {Multiply "\*"}, {Number "2"}>

### 3.5 Environmental needs

*Specify any other requirement.*

### 3.6 Special procedural requirements

*Describe any special constraints on the test procedures that execute this test case. These constraints may involve special set up, operator intervention, output determination procedures, and special wrap up.*

### 3.7 Intercase dependencies

*List the identifiers of test cases that must be executed prior to this test case. Summarize the nature of the dependencies.*

## 4. Multi-digit Numbers

### 4.1 Test case identifier

ID: TC-TOK-03

### 4.2 Test item

Tokenizer module. This test checks whether the tokenizer groups multiple digits into one number token instead of separating each digit.

### 4.3 Input specifications

Input: 123 + 456

### 4.4 Output specifications

Output: <{Number "123"}, {Plus "+"}, {Number "456"}>

### 4.5 Environmental needs

*Specify any other requirement.*

|                                        |                  |
|----------------------------------------|------------------|
| Arithmetic Expression Evaluator in C++ | Version: 1.0     |
| Test Cases for Tokenizer Module        | Date: 2026-05-04 |

#### 4.6 Special procedural requirements

*Describe any special constraints on the test procedures that execute this test case. These constraints may involve special set up, operator intervention, output determination procedures, and special wrap up.*

#### 4.7 Intercase dependencies

*List the identifiers of test cases that must be executed prior to this test case. Summarize the nature of the dependencies.*

### 5. Decimal Numbers

#### 5.1 Test case identifier

ID: TC-TOK-04

#### 5.2 Test item

Tokenizer module. This test checks whether the tokenizer correctly recognizes floating-point numbers.

#### 5.3 Input specifications

Input: 3.14 \* 2.5

#### 5.4 Output specifications

Output: <{Number "3.14"}, {Multiply "\*"}, {Number "2.5"}>

#### 5.5 Environmental needs

*Specify any other requirement.*

#### 5.6 Special procedural requirements

*Describe any special constraints on the test procedures that execute this test case. These constraints may involve special set up, operator intervention, output determination procedures, and special wrap up.*

#### 5.7 Intercase dependencies

*List the identifiers of test cases that must be executed prior to this test case. Summarize the nature of the dependencies.*

### 6. Invalid Character

#### 6.1 Test case identifier

ID: TC-TOK-05

#### 6.2 Test item

Tokenizer module. This test checks whether the tokenizer detects unsupported characters that are not numbers, operators, or parentheses.

|                                        |                  |
|----------------------------------------|------------------|
| Arithmetic Expression Evaluator in C++ | Version: 1.0     |
| Test Cases for Tokenizer Module        | Date: 2026-05-04 |

### 6.3 Input specifications

Input: 5 + a

### 6.4 Output specifications

Output: Error: Invalid token "a"

### 6.5 Environmental needs

*Specify any other requirement.*

### 6.6 Special procedural requirements

*Describe any special constraints on the test procedures that execute this test case. These constraints may involve special set up, operator intervention, output determination procedures, and special wrap up.*

### 6.7 Intercase dependencies

*List the identifiers of test cases that must be executed prior to this test case. Summarize the nature of the dependencies.*

## 7. Unary Minus (Negative Numbers)

### 7.1 Test case identifier

ID: TC-TOK-06

### 7.2 Test item

Tokenizer module. This test checks whether the tokenizer correctly handles a minus sign used as part of a negative number.

### 7.3 Input specifications

Input: -5 + 3

### 7.4 Output specifications

Output: <{Number "-5"}, {Plus "+"}, {Number "3"}>

### 7.5 Environmental needs

*Specify any other requirement.*

### 7.6 Special procedural requirements

*Describe any special constraints on the test procedures that execute this test case. These constraints may involve special set up, operator intervention, output determination procedures, and special wrap up.*

### 7.7 Intercase dependencies

*List the identifiers of test cases that must be executed prior to this test case. Summarize the nature of the dependencies.*

|                                        |                  |
|----------------------------------------|------------------|
| Arithmetic Expression Evaluator in C++ | Version: 1.0     |
| Test Cases for Tokenizer Module        | Date: 2026-05-04 |

## 8. Empty Input

### 8.1 Test case identifier

ID: TC-TOK-07

### 8.2 Test item

Tokenizer module. This test checks whether the tokenizer handles empty input without crashing.

### 8.3 Input specifications

Input: ""

### 8.4 Output specifications

Output: <>

### 8.5 Environmental needs

*Specify any other requirement.*

### 8.6 Special procedural requirements

*Describe any special constraints on the test procedures that execute this test case. These constraints may involve special set up, operator intervention, output determination procedures, and special wrap up.*

### 8.7 Intercase dependencies

*List the identifiers of test cases that must be executed prior to this test case. Summarize the nature of the dependencies.*

## 9. Malformed Number

### 9.1 Test case identifier

ID: TC-TOK-08

### 9.2 Test item

Tokenizer module. This test checks whether the tokenizer detects invalid number formats, such as a number with multiple decimal points.

### 9.3 Input specifications

Input: 3.1.4 + 2

### 9.4 Output specifications

Output: Error: Invalid number "3.1.4"

|                                        |                  |
|----------------------------------------|------------------|
| Arithmetic Expression Evaluator in C++ | Version: 1.0     |
| Test Cases for Tokenizer Module        | Date: 2026-05-04 |

## 9.5 Environmental needs

*Specify any other requirement.*

## 9.6 Special procedural requirements

*Describe any special constraints on the test procedures that execute this test case. These constraints may involve special set up, operator intervention, output determination procedures, and special wrap up.*

## 9.7 Intercase dependencies

*List the identifiers of test cases that must be executed prior to this test case. Summarize the nature of the dependencies.*

## 10. Consecutive Operators

### 10.1 Test case identifier

ID: TC-TOK-09

### 10.2 Test item

Tokenizer module. This test checks whether the tokenizer or validation stage detects invalid consecutive operators.

### 10.3 Input specifications

Input: 5 ++ 3

### 10.4 Output specifications

Output: Syntax error at position 3: unexpected operator placement

## 10.5 Environmental needs

*Specify any other requirement.*

## 10.6 Special procedural requirements

*Describe any special constraints on the test procedures that execute this test case. These constraints may involve special set up, operator intervention, output determination procedures, and special wrap up.*

## 10.7 Intercase dependencies

*List the identifiers of test cases that must be executed prior to this test case. Summarize the nature of the dependencies.*

## 11. Parentheses Tokenization (No Validation)

### 11.1 Test case identifier

ID: TC-TOK-10

### 11.2 Test item

|                                        |                  |
|----------------------------------------|------------------|
| Arithmetic Expression Evaluator in C++ | Version: 1.0     |
| Test Cases for Tokenizer Module        | Date: 2026-05-04 |

Tokenizer module. This test checks whether the tokenizer correctly creates tokens for parentheses without checking whether the parentheses are balanced.

### 11.3 Input specifications

Input: (2 + 3

### 11.4 Output specifications

Output: <{LeftParen "("}, {Number "2"}, {Plus "+"}, {Number "3"}>

### 11.5 Environmental needs

*Specify any other requirement.*

### 11.6 Special procedural requirements

*Describe any special constraints on the test procedures that execute this test case. These constraints may involve special set up, operator intervention, output determination procedures, and special wrap up.*

### 11.7 Intercase dependencies

*List the identifiers of test cases that must be executed prior to this test case. Summarize the nature of the dependencies.*
